<b>CUSTOMS DUTIES.</b>	<p>The General Act of the African Conference, referred to as the Berlin Conference 1885, was primarily intended to demonstrate the Agreement of the Powers with regard to the general principles which should guide their commercial and civilising actions and for the suppression of the Slave Trade, in the little known parts of Africa.</p>	<p>Berlin Conference, 26th Feb., 1885.</p>
	<p>This Conference defined what is known as the Congo Basin, which is bounded by the watersheds (or mountain ridges) of the adjacent Basins, namely, in particular, those of the Niari, the Ogowe, the Schari and the Nile on the North; by the eastern watershed line of the affluents of Lake Tanganyika on the east; and by the watersheds of the Basins of the Zambesi and the Loge on the South. It therefore comprises all the regions watered by the Congo and its affluents, including Lake Tanganyika, with its Western Tributaries.</p>	
	<p>The Berlin Conference established Free Trade and Commercial equality for all Nations.</p>	
	<p>The Brussels Declaration of 1890 modified the system of Free Trade for a period of twenty years, and allowed a maximum of 10% <i>ad valorem</i> duty on Imports.</p>	<p>Brussels Declaration, 2nd July, 1890.</p>
	<p>No further action was taken at the expiration of the twenty years, notwithstanding the provision of the Brussels Declaration, until the Treaty of St Germain-en-Laye, 1919. This Treaty removed the Maximum of 10% <i>ad valorem</i> duty on Imports and extended the Declaration for a further period of ten years.</p>	<p>Treaty of St. Germain-en-Laye, 10th Sept., 1919.</p>
	<p>For Customs purposes, Northern Rhodesia is therefore divided into two Basins known as the Congo and Zambesi Basins. The Congo Basin can roughly be taken to be all the territory North of a line drawn on the Map of Northern Rhodesia in a South-Westerly direction from Fife in the North-East, to the Border, where the Territory joins the South-Eastern corner of the Congo Belge. The Zambesi Basin is the rest of the Territory.</p>	
	<p>The Zambesi Basin is within the Customs Union of South Africa, which comprises the Union of South Africa, Northern Rhodesia, Southern Rhodesia, the British Bechuanaland Protectorate, Basutoland and Swaziland.</p>	<p>Govt. Notice No. 3 of 1925.</p>
	<p>Owing to the Berlin Convention granting Commercial equality for all Nations the Congo Basin cannot be included within the Customs Union of South Africa and for the same reason no British Preference can be given.</p>	
	<p>Different Customs Tariffs exist for each Basin and it is frequently necessary for Customs formalities to be observed for removal from one part of the Territory to another.</p>	<p>Ordinance No. 12 of 1925.</p>
	<p>The Ports of Entry into, and Exit from the Territory are: Livingstone, Ndola, Kazungula, Fort Jameson, Fort Rosebery, Abercorn, Isoka, Feira, Kansanshi, Mwinilunga, Chiengi, N'changa, Balovale, Mpika, Mokambo and Kawambwa.</p>	
	<p>Livingstone, Ndola and Fort Jameson are free warehousing Ports.</p>	
	<p>The following is the Customs Tariff for the Territory :</p> <p>Tariff for the Customs Union, Column "A."</p> <p>Tariff for the United Kingdom and British Possessions that reciprocate, Column "B."</p> <p>Tariff for British Possessions that do not reciprocate, Column "C."</p> <p>General Tariff, Column "D."</p> <p>Tariff for the Congo Basin, Column "E."</p>

	<i>SALE OF CROWN LANDS.</i>		
	<i>Farms.—Under Permit of Occupation.</i>		
	A tenant is required to pay 10 per cent. of the valuation placed on the farm as consideration for the grant of the permit of occupation. The balance of 90 per cent. represents the purchase price of the farm and the cost of survey which is payable over a period of 20 years. A rent equal to 6 per cent. on the purchase price, or the unpaid balance of the purchase price is payable annually.		
	<i>Township Plots outside Mining Areas.</i>		
	Plots are sold outright in townships at prices from £30 to £200 per plot according to the size and position of the plot and a survey fee of £4 is charged upon each plot. A building has to be erected upon each plot sold to at least the value of £500 before title deeds to the plot are issued.

## General information regarding the industry and the possibilities of development.

Preliminary investigations in connection with the establishment of a Forest Department have been commenced by a forest officer appointed to the Territory. Whilst more than 60 per cent. of the entire area of Northern Rhodesia is estimated, at present, to be covered more or less with trees and shrubs, the forest growth is undergoing considerable modification in composition and area as a result of native shifting cultivation and annual fires. It is proposed to maintain certain areas as protection forests for the prevention of soil erosion and the preservation and regulation of the water supply in springs and rivers. Further areas are to be dedicated to the production of timber of the more useful indigenous species. Arrangements are being made for the establishment of plantations of fast growing exotic species and private enterprise in this direction has already commenced in the mining areas. The only Timber industry in the Territory at present is that of the Zambesi Saw Mills at Livingstone. Concessions have been granted this Company to cut Timber in forests between Livingstone and the Machili River. The Paramount Chief Yeta has also granted this Company an option to cut Timber in the Barotse Reserve.

The arrangements for the transportation of the logs to Livingstone have been improved by the installation of a light railway which extends some 60 miles north-west from Livingstone. The logs are brought into Livingstone to be sawn.

The Company has contracts for supplying sleepers to the Union Railways and the Rhodesia Railways and the industry continues to expand. Forty-six Europeans and 1,810 Natives are employed in this industry.

Sun-dried fish is a common article of native trade throughout the Protectorate even at considerable distances from the source of supply. Native fish trappers maintain a very fair supply from December to April. The quantity brought in increases, if anything, from year to year tending to prove that the methods employed, though crude, are not unduly destructive.

State Area which has been geologically surveyed. Note any important mineral deposits known to exist, but not at present worked.

Approximately 40,000 square miles have been geologically surveyed, 5,400 square miles of which cover settled farming areas. 10,000 square miles were covered by photographic survey from the air. This survey by the mining companies continues and is producing very fine maps.

Nkana, Mindola, Nchanga, Roan Antelope, Roan Antelope Extension, Muliashi, Mufulira (and many other Rhodesian Selection Trust Ltd. properties in the Nkana Grant area), Kansanshi, Rhodesian Congo Border Concessions Ltd., prospects and Loangwa Concessions (N.R.) Ltd. prospects, Kasonso Copper Syndicate, all copper and certain Luiri Gold Areas Ltd. deposits of gold are deposits upon which drilling and underground work have been pursued with important results. The Roan Antelope Mine is now preparing for working on a scale of 5,000 tons of ore per day.

## 7. SUMMARY OF INDUSTRIAL DEVELOPMENT.

**Mining.**—RHODESIA BROKEN HILL DEVELOPMENT COMPANY.—The monthly Zinc output has been increased to an average of 1,100 tons. A new water channel has been constructed at the Mulungushi Power Station which will further increase the Horse Power. Vanadium was exported in July, October and December, but a regular output is expected shortly.

**BWANA MKUBWA COPPER MINING COMPANY.**—Large tonnages of ore continue to be mined from the open workings, and the plant is now running satisfactorily. Bore holes are being put down to prospect the ore body in depth. A sight for a large Vertical Shaft has been chosen and a bore hole put down to test the rock.

**THE ROAN ANTELOPE.**—Construction work has been going on steadily and production is expected to commence during 1932. A big Vertical Shaft is being sunk to handle the tonnage from the South Limb. The borehole prospecting on the Roan Extension and Muliashi has been satisfactory and the options on these two properties have been taken up.

**NKANA MINE.**—Two small Vertical Shafts, 500 ft. in depth, have been completed and a crosscut from one of these has passed through the ore body. Drilling was commenced on the west extension of the orebody at Mindola during the year and very satisfactory results have been obtained which will double the ore reserves of this property.

**MUFULIRA.**—Great strides have been made in the equipment of this property and four inclined shafts are being sunk. A railway line has been constructed to the mine from Mokambo in the Belgian Congo.

**NCHANGA.**—Extensive drilling operations have been carried on and a large body of ore has been proved. Shaft sinking on this body will commence early in 1930.

Rhodesian Selection Trust have registered 22 Copper Mining Locations in the Nkana Grant area and have established their Head Office at Chambishi where prospecting will continue.

**KANSANSHI.**—Underground development and diamond drilling have continued steadily with encouraging results.

Rhodesian Congo Border Concessions have continued the Geological examination of their area and several mining locations will be registered early next year.

Loangwa Concessions includes the Tanganyika concessions granted during the year.

**LUIRI GOLD AREAS.**—A large number of new claims have been pegged in their Grant. A power plant has been erected and milling was resumed in December.

The Sachenga Mica Mine and The Star Zinc Mine have been producing.

\*By "Penal Imprisonment" is meant imprisonment inflicted as a substantive punishment in pursuance of a sentence of a Court of Justice, as distinguished from imprisonment for safe custody, etc.

## CENTRAL PRISON, LIVINGSTONE.

*Questions.**Answers.*

I. If the prison is on a separate system, is the separation complete? And, if not, what is the separation enforced by day and night respectively?

For Europeans, Cape Boys and Asiatics the separate system is complete. For natives there are 7 (seven) segregation cells which are used for bad characters during the night and when not at work.

II. If not on the separate system, what provision is there for the supervision of the prisoners while in association?

Prisoners are in the charge of warders when at work. Sentries patrol the Prison within and without. The doors of cells have apertures for observation purposes. Native cells are lighted by electric light which can be controlled from the outside of the cells. No electric lighting has as yet been installed in European and native segregation cells.

III. How many cells are there; and how many associated wards?

7 European male cells	12 x 9 x 12 ft.
2 European female cells	10 x 12 x 12 ft.
7 Native cells	6'6" x 10 x 12 ft.
1 Native cell	20'6" x 20 x 12 ft.
3 Native cells	10 x 20 x 12 ft.
4 Native cells	11'6" x 20 x 12 ft.
1 Native cell	13 x 20 x 12 ft.
1 Native cell	7'6" x 12 x 12 ft.
1 Condemned cell	12 x 12 x 12 ft.
1 Sol. Con. cell	13 x 6 x 12 ft.
1 Hosp. Ward cell	24 x 15 x 12 ft.

IV. Taking the average number of prisoners in gaol, how many cubic feet of space are there for each prisoner during the hours of sleep?

European Males 1,404 cubic feet each; European Females 1,320 cubic feet each; Native Males 306 cubic feet each; Native Females 1,080 cubic feet each.

And what superficial area?

European Male 117 square feet; European Female 110 square feet; Native Male 25.6 square feet; Native Female 90 square feet.

V. How are the prisoners classified?

Prisoners are divided into classes as under:

*Class I.* Juveniles.

*Class II.* Prisoners convicted of minor offences, first offenders and other good conduct prisoners.

*Class III.* Incorrigibles, habitual criminals and others, who, from their past records or general behaviour in prison are thought to have a bad effect on No. I or No. II classes.

*Class IV.* Lunatics and others ordered to be detained during His Majesty's pleasure. It should be noted, that some natives in the latter category may be suitable for inclusion in *Class II*.

VI. Is penal labour—that is, labour by treadmill, crank or shot drill—in force?

No.

VII. If so, during what periods of imprisonments, in respect of what classes of prisoners, and during how many hours, is such penal labour enforced? In stating hours of treadwheel labour, give, first, the total time on and off at the wheel, etc.; secondly, the length of spells and intervals of rest.

Not applicable.

VIII. What kind of labour, other than penal labour, is in use?

Carpentry, tailoring, Brickmaking, Building, road making, quarrying. Maintaining prison garden, sanitary work and station upkeep.

IX. If the prisoners are employed beyond the walls of the gaol, state—

1. On what kind of work they are so employed.

All the above except carpentry and tailoring.

2. How are they supervised?

Small gangs by native warders; large gangs by native warders with a European warder in charge, when available.

3. How many escapes of prisoners, while being employed beyond the gaol, have taken place during each of the last three years?

1927 two, subsequently recaptured; 1928 nil; 1929 two, one since recaptured.

<i>Questions.</i>	<i>Answers.</i>
4. How the profits of their labour are accounted for.	Credited to revenue.
X. What was the total annual cost of the prison during the year?	£9,500 (Total for all Central Prisons).
XI. What was the annual amount of the prisoners' earnings during the year?	£1,892 17s. 3d. (Total for all Central Prisons) (This figure includes cost of convict labour hired out to Government Departments).
XII. What is the number of the hours allotted for sleep? and, if sleep is in association, are the dormitories lighted? And how often are they patrolled during the night?	12 hours. Native cells have electric lights which are controlled from outside and switched on at intervals. One sentry patrols inside and another outside the prison continuously.
XIII. What were the number and nature of the punishments inflicted for offences committed by prisoners undergoing imprisonment?	Spare diet and solitary confinement, 17; spare diet only, 61; lashes, 19; loss of marks, 12; spare diet and loss of marks, 28; extra labour, 7.
XIV. Is there, or are there any Chaplain or Chaplains of any, and what, religious persuasions?	Rev. C. Cooke, C.E.; Rev. Roulet, Paris Mission (Protestant).

## METEOROLOGICAL OBSERVATIONS.

---

Meridian of Longitude adopted for calculation of time adopted as standard in the Territory 30° East.

Hours fast on Greenwich Mean Time : 2 hours.

Rainfall was much below normal for the closing months of the season there being a general drought during the month of February. The rain season towards the close of the year was late in commencing but good and normal rains were reported generally.

Temperatures during the cold season were generally below normal but increased to above normal prior to the commencement of the rains in September and October.
